Informatics Academic & Training Programs

Degree Programs, Certificate Programs, Fellowships, and Short Courses

The following is a list of formal academic and training programs in North America in medical, nursing, and health care informatics. For a list of academic biomedical and health informatics programs outside North America, please [click here](#).

The icons below are used under the names of institutions to indicate the types of formal academic and training programs available.

- 10x10 Partner Program
- Associate degree in informatics
- Undergraduate degree in informatics
- Masters degree in informatics
- Doctor of Nursing Practice
- PhD degree in informatics
- Informatics specialization within other degree programs
- NLN-sponsored post-doctoral fellowships
- Other post-doctoral research fellowships
- Certificate program
- Short courses
- Online/distance education programs

If your institution has a program that should be included in this list, please [send a message here](#); include the Web address of your program and indicate which of the above types of degrees and training are available.

Please use the form below to find the program you are interested in.
