For Working Professionals

For professionals who have been working in an information field for three or more years, the Information School offers the Mid-Career MSIM program, tailored to meet the needs of busy working professionals. Classes are held Friday evenings and during the day on Saturdays, and use work-centered projects to allow students to bring their new-found knowledge immediately into the workplace. Students in the Mid-Career MSIM program come from a variety of organizations, including Boeing, Microsoft, the Seattle Times, AOL, Washington State Department of Transportation, Fred Hutchinson Cancer Research Center, and Starbucks, among many others.

Students in the Mid-Career MSIM program complete a minimum of 47 credits, structured around the following general degree plan. For information on projected course schedules and quarterly time schedules, please go to www.ischool.washington.edu/courses/schedules.aspx [1].
